Datensatz
(Tupel)

<u>PERSONALDATEN</u>	
PersNr	<input type="text"/>
Name	<input type="text"/>
Vorname	<input type="text"/>
Funktion	<input type="text"/>
Lohnstufe	<input type="text"/>

Attribute Felder (Attributwerte)

The diagram illustrates a user mask for a database table named 'PERSONALDATEN'. A bracket on the left groups the entire form as a 'Datensatz (Tupel)'. The form itself is a table with two columns: 'Attribute' and 'Felder (Attributwerte)'. The attributes listed are PersNr, Name, Vorname, Funktion, and Lohnstufe. Each attribute has a corresponding text input field. The input fields for Name, Funktion, and Lohnstufe are visually represented as black rectangles, while PersNr and Vorname are shown as empty text boxes. Brackets at the bottom identify the columns as 'Attribute' and 'Felder (Attributwerte)'.
